

## IR Hand Sensor Switch SW003

### Model: SW003

V+ ----DC input positive

V- ----DC input negative

DC input parameters

Input Voltage    Minimum 7V    Maximum 30V

Input Current    Maximum 6A

LED+ --- Output to LED Strip positive

LED- --- Output to LED Strip negative

The two IR diodes head should be put out of PC cover as the picture below.

- **Function:**

The LED lamp connected to the output the IR Sensor switch will turn on when the hand pass over the IR switch within 10cm in distance, and will turn off when the hand pass over the IR switch again.

The sensor switch will turn on or off with above repeatable steps.

**Detective Distance:** 5 to 10cm
